*The printing and posting of my Rough Lists is a considerable expense to me. I therefore appeal to the recipients to favour me occasionally with an order, otherwise the sending of these Catalogues must be suspended.—B.Q.*

## Sowerby's (James) Genera of Recent and

FOSSIL SHELLS, for the use of Students in Conchology and Geology, continued by G. B. Sowerby, F.L.S. Nos. I to XLII (all published), *bound in 2 vols. 8vo. 264 plates, carefully coloured* (pub. £12. 12s), *half morocco, uncut*, £4. 4s 1820-25

—— Parts XLI and XLII, wanting to many copies, sold separately, *with coloured plates*, each 6s

This beautiful and carefully executed work stopped short at part XLII; the intention of the authors to make an arrangement and Index was therefore never fulfilled. Upon the stock and coppers becoming my property, I had an Alphabetical Index and titles printed, and further, the plates, with their descriptive letter-press, arranged by the binder in numerical order, thereby rendering the work easy of reference. A few copies of my Index were printed

in excess, and possessors of unarranged copies may purchase it for 2s 6d.

This work is indispensable to all Shell Collectors, and the Figures (*drawn and engraved by Sowerby*) are superior to all others. It includes DESCRIPTIONS of the Distinguishing Characters of each GENUS, Land, Fresh Water, Marine, and also the STRATA, in which the Fossil Species occur.

## Sowerby's (Jas.) Mineral Conchology of Great

Britain, COMPLETE with General Index, and SUPPLEMENT by J. D. C. SOWERBY, 7 vols. large 8vo. 648 *finely coloured plates, with text* (pub. at £26.), *hf. morocco, or calf extra, gilt edges*, £15. 10s 1812-46

"A systematic work of great value; its figures of fossil shells are excellent, and it is still a standard work."—*Prof. O. C. Marsh, Pres. Amer. Assoc. of Science, Saratoga, 1879.*

## Sowerby's Mineral Conchology, The SUPPLE-

MENT to, royal 8vo. text, including the Alphabetical Index to the whole work, by J. D. C. SOWERBY, and plates 610 to 648, completing the work, in parts, as originally issued, £4. 4s 1840-46

This valuable Supplement has hitherto been out of print and very rare. Mr. QUARITCH being the proprietor of the Stock and Copyrights, has been enabled to make up a limited number of copies: possessors of incomplete sets of this book, therefore, should make immediate application for the Supplement, which will soon be rare again.

## Sowerby's British Mineralogy; or coloured figures

intended to elucidate the Mineralogy of Great Britain, 5 vols. large 8vo. 550 *plates, BEAUTIFULLY COLOURED* (pub. in Nos. at £17. 15s), *hf. russiä*, £7. 10s 1804-17

A work unsurpassed for accuracy of delineation and colouring by any modern publication. It must form the foundation of a mineralogical library, and is the indispensable companion to every owner of a Cabinet of Minerals.

## Entomology: DISTANT'S RHOPALOCERA MALAYANA:

A Description of the Butterflies of the Malay Peninsula, complete in twelve parts, royal 4to., *with 44 coloured plates, containing several hundred specimens*, £4. 4s 1882-86

—— the same, royal 4to. *hf. bd. morocco, gilt top*, £5. 5s 1882-86

In this work is given a Monographic Revision and Synonymic Catalogue of the BUTTERFLIES OF THE MALAY PENINSULA, including the Islands of Penang and Singapore. The Fauna of the western side of the Peninsula is at present best known, and is here principally treated. This area extends from Quedah to Johore, and thus comprises the Straights Settlements of Province Wellesley, Perak and Malacca.

- In an age when works on Sport and Natural History are so numerous, and when books, especially these on the latter subject, can be so beautifully produced, it would be a strange fact if, amongst the immense numbers of shooting-men, there are not a large proportion who take a keen interest in the birds they are in the habit of destroying. Though the Game Birds of this country are but few, and most men interested in sport have within their reach excellent pictures of the various species which are already best known to them in their complete stage of plumage, as yet no work that has been published in this country has entered fully upon a thorough description by illustration of all the stages of plumage, in addition to the varieties, hybrids, and unusual habits that are not perhaps generally known to the ordinary sportsman.

The best of all existing English Floras; every plant is represented life-size except the largest which are drawn on reduced scale.  
"The Flora Londinensis, of William Curtis, is a work deservedly held in high esteem. It is in five large volumes and contains six hundred and forty-seven coloured plates. It is said to have been the first Flora to represent plants of their natural size." In the words of a critic, "It may boast of having been brought to a close with unrivalled excellence, undiminished splendour, and unabated accuracy."

- "If the Flora Græca was most expensive to produce, the Flora Danica is, in some respects, the most remarkable. It is a very extensive work, consisting of eighteen large volumes, containing three thousand two hundred and forty coloured plates. The first fasciculus appeared in 1761. Its title-page announced that it was to contain portraits of the plants which grow in the kingdoms of Denmark, Norway and Sweden, the duchies of Sleswick and Holstein, and the seigniories of Oldenburg and Delmenhorst. The work was completed in 1883, one hundred and twenty-two years from its beginning. For four generations the work was steadily pursued, in spite of the encroachments and reverses which have left to Denmark not one of the dependencies named on the title-page I have quoted. A noble example of scientific zeal; a work which would add to the glory of the proudest nation on earth."—W. E. Endicott, Boston, U.S.

SMITH, cum Appendicibus et Indicibus, 10 vols. folio, with more than 900 *beautifully coloured plates* (subscription price, £252.) 1806-40  
"The Flora Græca, of Dr. John Sibthorp and James Edward Smith, is a very sumptuous work and by far the most costly in our library, for the expense of its production was no less than one hundred and fifty thousand dollars, which was defrayed from the proceeds of an estate left by Dr. Sibthorp for the purpose. As only thirty copies were sold, each cost the estate five thousand dollars. A second issue of forty copies was made about 1840. Ours is one of the first set. This splendid book is in ten large volumes, and contains one thousand figures of the plants of the Grecian peninsula and islands, in their natural size and colours. It would be difficult to speak too highly of these magnificent volumes, nor can I believe that any person, however indifferent to botany or uninterested in plants and flowers, could look upon these superb plates without delight."—*W. ## D. G. ELLIOT'S ORNITHOLOGICAL WORKS.

### Monograph of the Tetraoninæ, or GROUSE FAMILY,

5 parts in 4, forming 1 vol. complete, imperial folio, 27 *coloured plates, bds.*  
 £8. 10s New York, 1864-65

— the same, 1 vol. imperial folio, *vellum, gold borders, gilt edges*, £9. 10s

1864-65

A necessary work alike for the ornithologist and sportsman. Eyton's copy sold for £23.

### Monograph of the Phasianidæ, or FAMILY of the

PHEASANTS, 2 vols. in 6 parts, imperial folio, 84 *coloured plates, boards, rare*, £60 1870-72

— the same, 2 vols. imperial folio, *half morocco, gilt edges*, £63 1870-72

— the same, 2 vols. imperial folio, *splendid copy in green morocco super extra, sides and back richly gilt, gilt edges*, £66 1870-72

### Monograph of the Paradiseidæ, or BIRDS of PARA-

DISE, in 7 parts, imperial folio, 37 *coloured plates, unbound*, £11 1873

— the same, *half red morocco, uncut*, £12. 10s 1873

Eyton's copy sold for £21.

### Monograph of the Bucerotidæ, or FAMILY of the

HORN BILLS, 10 parts, forming 1 vol. imperial 4to. 59 *coloured plates, and 2 of Generic Characters, with text* (pub. £11. 11s), £8. 8s 1877-82

— the same, imperial 4to. *half morocco, gilt top*, £9. 9s 1877-82

— the same, LARGE PAPER, imperial folio, £21 1877-82

Only 25 copies were printed on Large Paper.

This work contains illustrations of all the known species of the Family; the small paper issue is uniform with Temminck's *Planches Coloriées*, Selater and Slavin's *Exotic Ornithology*, etc., the Large Paper with the Author's works in folio, and Gould's works.

"The very peculiar appearance of the majority of the birds contained in this volume, as well as the extraordinary habits and structure common to all, which make them to differ from other feathered creatures, together with the generally meagre accounts of many of the species, only to be met with by searching numerous publications, were the chief reasons that induced me to select this family as the subject of my fifth illustrated monograph.

"The drawings, the happy results of Mr. Keuleman's talented pencil, most characteristically depict the strange forms and attitudes of these curious birds."—*Preface*.

### Monograph of the Pittidæ, or FAMILY of the ANT-

THRUSHES, impl. folio, 31 *coloured plates*, New York, 1868

Eyton's copy fetched £36.

The new edition is in preparation.

### The Birds of North America, the new and heretofore

unfigured Species of the, 15 parts forming 2 vols. impl. folio, 72 *coloured plates*, £40 New York, 1866-99

Copies are expected from New York.

### Elliot (D. G.) The Felidæ, or FAMILY of the CATS,

11 parts forming one vol. impl. folio, 49 *superbly coloured plates of Lions, Tigers, Leopards, etc.* Subscription price £27. 10s 1878-83

The graceful forms and beautifully coloured dress of the living members of the Felidæ excite the admiration of all who see them, and they afford most attractive subjects for pictorial representation.

One hundred and fifty copies only are printed; and the Drawings are erased from the stones, thus making it impossible to increase the edition.

The plates of these magnificent works were drawn in the highest style of Art; those of the Birds of North America and the Pittidæ by the Author, and those of the Tetraoninæ, the Phasianidæ and Paradiseidæ by the celebrated Joseph Wolf and J. Smit. The colouring has been effected by the best Colourists of London.

## ELLIOT'S ORNITHOLOGICAL WORKS:

*In preparation, a new enlarged edition*

OF

D. G. ELLIOT'S MONOGRAPH OF  
THE PITTIDÆ  
OR FAMILY OF ANT-THRUSHES,impl. folio, 51 *coloured plates*, with an entirely new descriptive  
letterpress.

The first edition of this valuable monograph appeared in 1867, and, owing to its limited impression, copies have long been very rare, and have fetched high prices—Eyton's having sold for £36. The Author having often been requested by Ornithologists to bring out a new edition, has now consented, and he is actively engaged in re-writing the text.

This new edition will contain the thirty-one plates as the first edition, and TWENTY ADDITIONAL plates of species lately brought to Europe, chiefly deposited in the British Museum. The distinguished draughtsman, Mr. Hart, will design, draw on stone and colour these twenty extra plates.

This new edition of the Pittidæ will therefore contain fifty-one coloured plates, all with elaborate backgrounds.

The work will be issued in five parts, at three guineas each, payable on delivery, the buyer binding himself to take the whole work.

Any gentleman wishing to prepay for the work may do so by forwarding a cheque for £15.

The entire edition will only consist of seventy copies,

Annexed is a list of the Birds which will be represented in the new edition.

Only 500 copies printed.

The ancient Gascon family of Brocas still survives in Hampshire and in France. The earlier part of its story is so closely interwoven with the annals of Edward III, the wars of the Black Prince, and the times of Richard II, that it forms a valuable supplement to the literature of English history in the fourteenth century, and will be found highly interesting by many readers; even down to the time of Charles II, the Brocases were personages of some distinction, and their names will be found associated with events of importance. The chief antiquarian interest of this volume lies, however, in its picture of Aquitaine, under the Plantagenet sovereigns of England—a subject which is usually studied only in the glimpses afforded by chronicles dealing with general history.

This book—the most valuable in certain respects of all the works of the eminent traveller—has long been rare and difficult to obtain even at a very costly rate. To supply the great existing demand for it, the present reprint has been executed, and is now offered to the public at a moderate price.

**RHOPALOCERA MALAYANA:** a Description of the Butterflies of the Malay Peninsula, by W. L. DISTANT, 4to. 16 and 486 pp. and 46 *coloured plates*, in parts, £4. 4s; *hf. bd. morocco, £5. 5s* London, 1882-86

A short time ago we called attention to a work in progress on the Butterflies of India. Immediately thereafter there came to hand the final part of another notable work on the butterflies of a region still nearer our antipodes—the Malay Peninsula. In this instance the work was undertaken by the author under peculiarly favourable circumstances, inasmuch as all pecuniary anxiety was removed by the appearance of a Maecenas in the person of Dr. D. Logan, of Penang, to whom all credit is due by naturalists the world over, not only for the generous way in which he has allowed the work to be gotten up and illustrated, but for his excellent choice of an author. For Mr. Distant, on his side, has performed his task in a very scholarly manner, and given us a book leaving little to be desired, beyond that constant and bitter craving of naturalists for a knowledge of the earlier stages of life of the insects treated. We could indeed wish that the structural characteristics of the larger divisions had been more amply treated, and that the author had not rested satisfied with groupings in the *Lycaeninae* and *Hesperidae*, newly manufactured, confessedly artificial and temporary, and to which the very descriptions which follow do violence. But the excellence of the entire work, the consistent manner in which the task has been carried out, the technical skill, excellent judgment and broad learning everywhere displayed, as well as the very considerable addition to our knowledge involved, disarms adverse criticism and invites only praise. Would that such a Maecenas and such an author might oftener company together!

The work is published in quarto in sumptuous style, is unexceptionable in typography and profusely illustrated. Besides 46 plates of some of the best chromo-lithographs of butterflies which we have ever seen, there are 129 woodcuts scattered through the text, generally illustrating special structural features, especially in neuration and leg structure, which are of the greatest value. . . . It remains only to say that a good deal of interesting reading will be found scattered through the portly volume, and that there are points in the preface worthy of special attention. About 500 species are described.

SAMUEL H. SCUDDER.

*From the Canadian Entomologist, vol. xiv, p. 139.*

"Each species is represented by a coloured figure (upper side and under side), and the details of its habits, variation, and geographical distribution are given. The plates are executed in the highest style of chromo-lithography.

"The author enters fully into the structure and metamorphoses of the different groups, discusses their natural relationships, and under each species gives full details regarding geographical distribution and variation. . . . Such a work is deserving of all encouragement, and we trust that its success will answer the expectations of its promoters."—*Ann. and Mag. Nat. Hist.* (ser. 5), vol. 10, p. 171.

"The work is much more than a mere dry monograph of Malay Butterflies; it abounds in philosophical observations, and references are given to other authors who have dealt with the biology of the *Lepidoptera*."—*The Zoologist*.

"The descriptions are full and careful, and much judgment is shown in using, as far as possible, old and well-established names, and in rejecting needless sub-divisions of the genera."—*Nature*, May 4th, 1882.

"The actual publication is due to the "W.L.D." whose articles on the Malay Peninsula have appeared in our columns, and who has not only in past years worked hard while obtaining a personal acquaintance with the *Lepidopterous* Fauna of Penang and Province Wellesley, but has never lost an opportunity of acquiring subsequent information, both oral and published, of his feathery favourites. He rightly anticipates that this illustrated treatise may prove useful to other than Malayan Entomologists, as the Malayan Butterfly Fauna is very rich in species, and very typical of the Oriental region, including numbers that are found in Continental India, and many that are common to Sumatra, Java, and Borneo."—*Field*, May 13th, 1882.

"This book will be really of necessity to those working the insect fauna of the Indian region."—*Entomologist*.

"The plates are in the best style of chromo-lithography."—*Ent. Mo. Mag.*

## Faber's Fisheries of the Adriatic and the Fish thereof;

to which is added a Systematic List of the Adriatic Fauna with the Italian and Croatian Nomenclature, by GEORGE L. FABER, *Her Britannic Majesty's Consul for Fiume*; prefixed is an Introduction by DR. GÜNTHER, Keeper of the Zoological Department, British Museum, 1 vol. small 4to. 250 pp. of text, *illustrated by a series of 18 elaborate woodcuts by Miss Leo Litrow, and 24 engravings of Fishing Boats, Nets, Gear, etc., extra cloth, gilt edges* (published at £1. 11s 6d), 7s 6d 1883

A thoroughly scientific and most elegantly got up work.

"This handsome quarto volume of some three hundred pages may be regarded as the author's contribution to the International Fisheries Exhibition. It relates to fisheries of which comparatively little is known in this country, and will be found to afford many practical suggestions of much interest to British fish-culturists and fishermen. In the short introduction which Dr. A. Günther has written to the work he calls the attention of English pisciculturists to the methods practised by the Italians of rearing the fry of marine fishes, such as the red and grey mullets, the different flat fishes, eels, &c., in enclosed waters, and keeping them in captivity until they become a marketable size, a practice which, unlike the hatching of ova and allowing the fry to escape, is to be recommended by its yielding direct and immediate profitable results.

"The work commences with a chapter on the Fauna of the Adriatic, and the haunts of the fish and invertebrate animals composing it. Next follows an historical account of the pro-

gress of the fisheries, which have been greatly affected by the varying political conditions of the countries that constitute the shores of the Adriatic.

"The account of the fish markets on the coast of the Adriatic is very interesting. Passing over the fish recognized by ourselves as edible, we have others which are not valued in this country. The spiny dogfish is esteemed a delicacy, and as being greatly superior to the smooth hound and the spotted dogfish, which are also eaten. The flesh of the larger sharks also makes its appearance in the markets; whilst sea cucumbers and sea urchins—the latter in spawn—form important articles of food on the southern shores. The large sea turtle is sometimes to be seen in the Dalmatian markets, some specimens reaching a weight of 80lbs.; and at Fiume and all over Istria small freshwater turtles are largely consumed, being considered a great delicacy. They cost from two-pence to three-pence each, and are brought by the shipload from Greece and Albania.

## Falconry: HARTING'S BIBLIOTHECA ACCIPITRARIA: A

Catalogue of Books, Ancient and Modern, relating to Falconry; with Critical Notes, GLOSSARY and POLYGLOTT VOCABULARY, by JAMES EDMUND HARTING, *Librarian to the Linnean Society of London*, 1 vol. 8vo. viii and 254 pp. with 16 plates of famous Falconers, the frontispiece in colours, Roxburghe, subscription price, £1. 11s 6d 1891

Only 300 copies are printed.

Falconry, like other Field Sports, has its literature. It would be strange if it were not so; for, on turning over the pages of the world's history, it is apparent that for centuries it has played a conspicuous part amongst the diversions of people of all nations.

But the literature of the subject has been much neglected. The older treatises in all languages have become scarce and costly, and of the rest the booksellers are unable to supply, or even to name, a tithe of them.

This, perhaps, is partly due to the circumstances that no Bibliography of Falconry having any claim to completeness exists.

## Falconry: BERT'S TREATISE OF HAWKS, 8vo. hf. bd. 21s

Reprinted, 1891

"Of the three Treatises by our old English masters of Falconry, Turberville, Latham, and Bert, that of Bert at the present time is undoubtedly the scarcest. It does not appear that any copy has been offered for sale for very many years, while in regard to the others, a few examples turn up almost annually at book sales; although if in good condition they fetch sufficiently high prices.

"Edmund Bert's work, which is entitled 'An Approved Treatise of Hawks and Hawking,' was published in 1619, and until the present time has never been reprinted, whereas the other works mentioned have each passed through two or three editions. This circumstance no doubt accounts in some measure for its greater rarity, while from certain statements of the author, it would appear to have been printed chiefly to oblige his friends, and was not intended for general circulation. He remarks (p. 8), 'It hath long lain by me, and that I have not been forward to publish this, but in a manuscript, is very well known to many of my friends.' From this it may be inferred that only a limited number of copies were originally printed.

"We have only to add that this reprint has been edited, with an introduction, by Mr. J. E. Harting, and we do not doubt that it will prove an acceptable addition to the bookshelves of modern falconers."—From *The Field*, June 13th, 1891.

# THE JEYPORE PORTFOLIOS OF ARCHITECTURAL DETAILS,

COMPILED BY  
COLONEL S. S. JACOB, C.I.E.  
*Engineer to the Jeypore State in Rajputana.*

HIS work consists of a collection of measured drawings from Buildings, chiefly in or near Delhi and Agra, and parts of Rajputana, arranged in a series of Portfolios with short descriptive notes of the places from which they have been taken.

The drawings have all been made with care, and arranged together in parts, each sheet being loose, so that different examples of architectural details may be readily compared and selections made.

The Plates are produced to large scales, so that they may prove useful to Schools of Art and Design, and to serve as working drawings for the architect and artisan.

Many of the designs can be used in stone, in wood, or in metal work, and in wall decoration.

Six Parts, each in a strong Portfolio, are published, arranged as follows, each Plate on a sheet 22 inches by 15 inches.

PART I. COPINGS AND PLINTHS:—

52 Plates, comprising 112 examples of Copings and 20 of Plinths.

PART II. PILLARS, CAPS, AND BASES:—

79 Plates, comprising 158 examples, viz. 127 of Pillars and 31 of Bases.

PART III. CARVED DOORS:—

66 Plates—11 representing inlaid ivory work printed in colour—comprising 27 Doors, 68 Panels, and 74 other details.

PART IV. BRACKETS:—

69 Plates (2 coloured), comprising 86 examples.

PART V. ARCHES:—

58 Plates, of which many are coloured.

PART VI. BALUSTRADES.

50 Plates, comprising 51 examples—many of the panels are filled with tracery.

The Drawings have been beautifully photolithographed by W. GRIGGS & SONS, of Peckham, London, S.E.

In all 374 Plates, comprising 24 in colours—654 examples. Price of the six Parts complete, each in a strong Portfolio cover, £7. 10s

\*.\* A further series, including the following, is also in hand. Tracery; String Courses; Wall Decoration, including Dadoes, Wall Recesses, and Panels; Cornice and Ceiling Decoration; Parapets, Projecting Eaves and Finials.

These will be issued in similar Portfolio Parts as soon as complete.

**Jardine (Sir Wm.) BRITISH SALMONIDÆ ; atlas folio,**  
*comprising 12 large and splendidly COLOURED plates of*  
*the Salmon Species, with letterpress description, with three*  
*beautiful vignettes, in a portfolio, £8. 8s* 1839-41

This magnificent series of coloured plates was privately printed at the expense of Sir William Jardine. Each plate has a charming back-ground of some delightful bit of Scotch scenery. Most of the figures are of the full size of life.

**Kemble (John M.) the Saxons in England :**

a history of the English Commonwealth till the period of the Norman Conquest, 2 vols. 8vo. pp. ix-435, and 562, *facsimile reprint of the scarce original edition published in 1849, cloth, 20s* 1876

This important work had become so rare that the copies which occasionally turned up at sales were eagerly competed for, and brought three or four times the original publication-price. It was the *magnum opus* of its author, a scholar unrivalled in his knowledge of the earliest English history and antiquities. The works of Sir Francis Palgrave, Lappenberg, and Mr. Freeman, all belong like this to the new school in which the notions of most writers upon ancient England are replaced by

new and sounder views, but "the Saxons in England" must be studied by all who would effectively clear their mental atmosphere of the old clouds of ignorance and error. In this treasury of historical knowledge and criticism, the *origines* of the English race have to be sought for, and the earliest forms of that Teutonic civilization which has developed into the society and institutions of the United Kingdom and the United States.

MODERN FRENCH READINGS, 12mo. *cloth, 467 pages, 4s* Boston, Mass. 1883

Professor Knapp's Elementary books deserve the best attention of students.

**Litta (P.) Famiglie Celebre Italiane:** the Titles,

Tables of Contents, and General Index to Vols. I—X, royal folio, £2. 2s 1875

The most elaborate and most valuable of all Genealogical Works is undoubtedly Litta's grand work on the Noble Families of Italy. Strange to say, its original and present editor have entirely neglected to issue proper titles, tables of contents, or an index to it.

I have remedied this serious drawback, and printed everything required to make "Litta's Noble Families of Italy" an easy Book of Reference.

## Leach (W. E.) *Malacostraca Podophthalmata*

BRITANNIÆ, or Description of the British Species of Crabs, Lobsters, Prawns, etc. *illustrated with coloured figures of all the species* by JAMES SOWERBY, 19 parts, in 1 vol. royal 4to. complete, 54 coloured plates (sells £8. 8s), *hf. morocco*, £2. 12s 6d 1815-20-75

—— the same, **Large Paper**, 19 parts, in 1 vol. imperial 4to. 54 coloured plates (sells £12.), *hf. bound morocco*, £8. 8s 1815-20-75

—— the same, parts XVIII and XIX **completing the work**, royal 4to. 7 coloured plates, £1. 11s 6d; or, **Large Paper**, impl. 4to. £2. 2s 1875

The authors of this work announced that it was their intention to complete it in about nineteen parts; however, they stopped short at part xvii. Since the acquisition of the stock by Mr. Quaritch, he has had the work completed by Mr. George Brettingham Sowerby, the eminent naturalist. That gentleman has added plate 35, a **VERY LARGE FIGURE OF A LOBSTER**, which remained unfinished at the cessation of the work; a *Generic and Specific Index* to the entire work; and has drawn fifteen new species, on *six entirely new copper plates*, with descriptive *letterpress*.

This is the finest book on Stalk-eyed Crustacea.

## Lea (Henry C.) *Chapters from the Religious*

HISTORY OF SPAIN connected with the Inquisition, 8vo. 522 pp. *cloth*, 12s *Philadelphia*, 1890

Mr. Lea's History of the Inquisition in the Middle Ages was absolutely the first philosophical work based on exact knowledge which had ever been written upon the subject. The present "Chapters" is a more elaborate and extended treatment of some portions of the matter, and it must be regarded as an indispensable complement of the former book. The sections are: Censorship of the Press; Mystics and Illuminati; Endemoniadas; el Sante Niño de la Guardia; Brianda de Bardari (the last two relating to the conversion and expulsion of the Jews). Thus it will be seen that a great many readers, not particularly interested in the history of the Inquisition *per se*, will find in these "Chapters" some valuable disquisitions on the aberrations of the human mind, and things connected with the study of occult science.

## Lea (Henry C.) *Superstition and Force:*

Essays on the Wager of Law, The Wager of Battle, The Ordeal, and Torture. Third Edition, enlarged, 8vo. *cloth*, 9s *Philadelphia*, 1878

"As a work of curious inquiry on certain outlying points of obsolete law, 'Superstition and Force' is one of the most remarkable books we have met with."—*London Athenæum*, November 3rd, 1866.

"He has thrown a great deal of light upon what must be regarded as one of the most instructive as well as interesting phases of human society and progress. . . . The fulness and breadth with which he has carried out his comparative survey of this repulsive field of history [Torture], are such as to preclude our doing justice to the work within our present limits. But here, as throughout the volume, there will be found a wealth of illustration and a critical grasp of the philosophical import of facts, which will render Mr. Lea's labours of sterling value to the historical student."—*London Saturday Review*, October 18th, 1870.

## Lea's History of Celibacy: an Historical Sketch of

Sacerdotal Celibacy in the Christian Church, 8vo. second edition, enlarged, xx, 682 pp. (pub. 16s), *cloth*, 12s *Boston, Mass.*, 1884

"This subject has recently been treated with very great learning, and with admirable impartiality, by an American Author, Mr. Henry C. Lea, in his *History of Sacerdotal Celibacy*, which is certainly one of the most valuable works which America has produced. Since the great history of Dean Milman, I know no work in English which has thrown more light on the moral condition of the Middle Ages, and none which is more fitted to dispel the gross illusions concerning that period which positive writers and writers of a certain Ecclesiastical school have conspired to sustain."—*Lecky's History of European Morals*, Chap. v.

"Mr. H. C. Lea's work is a book of formidable size (642 pp.), and dealing only 'with the enforced celibacy of the sacerdotal class.' But as the survey ranges from the Essenes to the priesthood of modern Catholicism, the field is sufficiently wide. The author's reading has been extremely minute, and his monograph appears to be exhaustive. We notice that he takes a very unfavourable view of the morality of the priesthood of Continental countries (pp. 621-638). We should like especially to direct the attention of those who believe in the present value of the monastic orders in education to the appalling statistics on pp. 636-637. More, of course, we cannot say on this subject."—*Westminster Review*, April, 1885.

## Lee's Glossary of Liturgical and Ecclesiastical

TERMS, compiled and arranged by the Rev. FREDERICK GEORGE LEE, D.C.L., F.S.A., *Vicar of All Saints', Lambeth*, 1 vol. 8vo. about 500 pp. with upwards of a hundred illustrations on wood (pub. at 21s), cloth, 6s 6d; or hf. bd. Roxburghe, elegant, 7s 6d 1876

This volume contains more than five thousand explanations of Liturgical and Ecclesiastical terms, both Eastern and Western. It has been the compiler's object to give in a comparatively small compass and in a popular form as much information as possible set forth in terse and clear language concerning the meaning of such terms—a subject of study peculiarly interesting and current at the present day, and one to which considerable attention is now being directed by the laity as well as the clergy. The compiler has been for many years collecting materials for the volume from all ordinary liturgical books and treatises, and has consulted nearly two hundred MSS., e.g. Church and Churchwardens' Accounts, of different periods, which throw much light both on the Statute law and Custom of the English Church. He has also made considerable use of the various County Histories, which contain so much untabulated information, and is indebted to many friends for notes, records of facts, literary guidance and friendly criticism. The illustrations are largely taken from English examples.

## Ordnance Survey Office Publications:

FACSIMILES of NATIONAL MANUSCRIPTS of ENGLAND, photozincographed by Sir Henry James, complete, 4 vols. sq. folio, 338 facsimiles of all kinds of Documents, State Papers, Royal Letters, Reports, Despatches, etc. with translations, cloth, the first volume is rare, £4. 4s Southampton, 1865-68.

"The series ranges from the Norman Conquest to the reign of Queen Anne, and in order to invest the work with an additional interest, only such records have been selected for copying as are either historically important or curious in themselves."—*Preface*.

NATIONAL MANUSCRIPTS of SCOTLAND, selected under the Direction of the Rt. Hon. Sir W. Gibson Craig, Bart., Lord Clerk Register of Scotland, by the late Dr. John Robertson, and continued with Introductions by Cosmo Innes. Photolithographed in Facsimile by Col. Sir Henry James, 3 vols. impl. folio, facsimiles of 272 MSS. with transcript and translation to each, hf. bd. £6. 6s Southampton, 1867-71

Now quite out of print and rising in value.

This important series ranges from the eleventh Century to the reign of Charles I, to which are appended a few MSS. of a later period, including the Treaty of Union in 1706. In looking over these volumes one is struck by the richness of the collection, illustrating the progress of Society as well as the chief political changes, the origin and rise of letters, and the Literature and Language of Scotland.

FACSIMILES of NATIONAL MANUSCRIPTS of IRELAND, selected and edited by J. T. GILBERT, and photo-zincographed by SIR HENRY JAMES, under the direction of the Right Hon. Sir Edward Sullivan, Master of the Rolls in Ireland, Parts I, II, III, IV (the fourth being in 2 vols.)—5 vols. roy. folio, 312 facsimiles of Charters, Royal Letters, Heraldic and Genealogical Documents, the Miniatures of the originals being reproduced in gold and colours, with text, hf. bd. rare, £18. 18s

BUTLER (Capt. E. A.) Catalogue of the Birds of Sind, Cutch, Ka'lhia'wa'r, North Gujara't, and Mount Aboo, 8vo. *sd.* 1s *Bombay*, 1879

"These references have been confined as much as possible to Jerdon's Birds of India, Mr. Hume's Raptures and Stray Feathers, works which all who take an interest in the subject should be in possession of."—*Author.*

BUTLER. Catalogue of the Birds of the southern portion of the Bombay Presidency, 8vo. *map of the Dekkan and S. M. Country, sd.* 1s *Bombay*, 1880

This Catalogue describes 1005 species of Birds, 426 of which are known, up to date, for certain to occur within the stated region. The rest are such as have been procured in other parts of the Malabar coast. The work is arranged on the plan of Jerdon's Birds of India.

DES MURS, ICONOGRAPHIE ORNITHOLOGIQUE: Nouveau Recueil général de planches peintes d'Oiseaux, pour servir de suite et de COMPLEMENT aux planches Enluminées de BUFFON et aux planches coloriées de TEMMINCK et LAUGIER de Chartrouse, avec texte, figures par PRÉVOT et OUDARD, COMPLETE in 1 vol. impl. 4to. 72 superbly coloured plates, *hf. bd. morocco*, £4. 4s *Paris*, 1845-49

—— the same, LARGE PAPER, roy. folio, £6. 1845-49

This beautiful work, now out of print, and very scarce, forms a "Complement" to Buffon's Planches Enluminées and Temminck and Laugier's Planches Coloriées. The plates, from the pencil of M. Oudard are beautifully executed. The new work, "Exotic Ornithology," by Messrs. Sclater and Salvin, now complete, forms a suite to the "Iconographie." Those who possess the works of Buffon or Temminck, and all subscribers to the "Exotic Ornithology" should also have this fine work of Des Murs.

DIGGLES' COMPANION TO GOULD'S HANDBOOK; or SYNOPSIS of the BIRDS of AUSTRALIA, containing nearly one-third of the whole, or about 220 examples, for the most part of the original drawings, by Silvester Diggles, in 2 vols. imp. 4to. 123 plates containing 224 figures, beautifully coloured, with descriptive text, half morocco, £16. 16s *Brisbane*, 1877

Seeing that the magnificent work of Mr. Gould, on "The Birds of Australia," so completely supplies every want of the Ornithologist in this particular direction, it may be thought that any other work is superfluous; but copies of Mr. Gould's Ornithology are so difficult to procure, and their price is so far beyond the means of any but the most wealthy, that the Author of the present publication deems any further reasons for the necessity of a second work unnecessary, as he desires to place within the power of all who wish to obtain it, an accurate and useful book of reference, at as low a cost as will allow of its being published creditably.

**Exotic Ornithology [South American]**, by SCLATER and SALVIN, impl. 4to. 100 superbly coloured plates of hitherto UNDESCRIBED and UNFIGURED Birds 1866-69

—— the same, LARGE PAPER, imperial folio, 13 parts, complete, 100 beautifully coloured plates, subscription price, £20. 1866-69

Under this title has been completed a series of 100 COLOURED LITHOGRAPHIC ILLUSTRATIONS of NEW, or hitherto UNFIGURED BIRDS, to form a SUPPLEMENT to BUFFON's Planches Enluminées, *Paris*, 1770-86; to TEMMINCK's Planches Coloriées, 5 vols. *Paris*, 1838; and to DES MURS, Iconographie Ornithologique, *Paris*, 1845-49.

Although it was originally intended by the Authors that the subjects for illustration in this work should be selected from the many new ornithic forms which the exertions of modern collectors have recently brought to light in nearly every part of the world's surface, particularly the Tropics, it was found, as the work progressed, that it would be more convenient in this first series to restrict it to the birds of the Neotropical region, *i.e.* AMERICA south of the United States.

FIFTEEN copies have been printed on LARGE PAPER, royal folio, to match the Large Paper issues of Temminck and Des Murs.

EYTON'S OSTEOLOGIA AVIUM; or, a Sketch of the OSTEOLOGY OF BIRDS, by T. C. EYTON, F.G.S., F.L.S. Complete with all the Supplements in 1 vol. 4to. 185 plates and descriptive letterpress, an important Ornithological Work (published at £10. 1s in parts), now offered, half bound morocco, for £4. 4s 1867-75

JARDINE (Sir W.) *Contributions to ORNITHOLOGY*, from the commencement in the year 1848 to 1852, all published (containing papers on new or hitherto undescribed Birds, by Gordon, Gould, Kaup, Strickland, and other eminent naturalists), one vol. of Text, and one vol. containing 94 plates, most of which are beautifully COLOURED, together 2 vols. 8vo. *hf. morocco, uncut*, VERY RARE, £4. 4s *London and Edinburgh*, 1848-53

Jardine's "Contributions" is one of the rarest works in the whole range of Ornithological Literature. Many English Birds are here figured and described for the first time.

MEYER (H. L.) *Illustrations of BRITISH BIRDS and their Eggs*, second edition, 4 vols. folio, 336 coloured plates, half green morocco, gilt edges, £31. 10s (1835-41)

This beautiful work comprises accurate figures both of migratory and indigenous birds, and in most instances both male and female, accompanied by their eggs and by curious or rare nests. It is celebrated for the beauty and accuracy of the colouring.

SCLATER'S JACAMARS and PUFF BIRDS: A Monograph of the Jacamars and Puff Birds or Families GALBULIDÆ and BUCCONIDÆ by P. L. SCLATER, M.A., PH.D., F.R.S., 7 parts forming 1 vol. roy. 4to. *with 55 plates and woodcuts in the text, the plates BEAUTIFULLY COLOURED (issued to Subscribers only, in 7 parts, at £7. 7s), £3. 3s* 1879-82

— the same, *half morocco, gilt top, £3. 15s*

1879-82,

The monograph comprises all the known varieties of these interesting families of Birds chiefly found in the West Indies and South America.

SHELLEY'S SUN BIRDS: a MONOGRAPH of the NECTARINIIDÆ, or Family of Sun-Birds, by Captain G. E. SHELLEY, F.Z.S., F.R.G.S., etc. author of "A Handbook to the Birds of Egypt," etc. 4to. 120 *coloured plates* (cost to subscribers, £12. 12s), *unbound, £5. 5s; or hf. bd. morocco, £6. 6s* 1881

In the present work the author has treated only of the Nectariniidæ, or true Sun-birds, leaving for a later period the consideration of the other forms which link these birds with the large group of the Honey-suckers. To a great extent the scope of this Monograph is similar to that of the little volume on Sun-birds published in 1843 by the late Sir William Jardine in the Naturalist's Library, which work, for many years the best authority on the subject, is now out of date, owing to the number of species that have been described since the above-mentioned year.

SIEBOLD, LES OISEAUX DU JAPON, 1 vol. impl. 4to. 120 *coloured plates*, with French text, *unbound, £15. 15s; or, hf. morocco, £16. 16s* 1850

This is one of the most important works on Oriental Ornithology, and has become scarce.

SHARPE'S BIRDS OF SOUTH AFRICA, by E. L. LAYARD, F.Z.S., &c., *H. B. M. Consul at the Fiji Islands*, new edition, 1 vol. royal 8vo. *with 12 coloured plates*, thoroughly revised and augmented by R. BOWDLER SHARPE, F.L.S., F.Z.S., &c., &c., *Assistant in the Zoological Department, British Museum, hf. bd. £2. 12s 6d* 1875-84

The first edition of Mr. Layard's work on the "Birds of South Africa" has long been exhausted, and before leaving England for Fiji he entrusted all his MSS. to Mr. Sharpe, to bring out a second edition of the work. Notwithstanding the success of the first edition, which was written in South Africa, and which has done more to advance the Ornithology of a country than any other work ever written (Jerdon's "Birds of India" excepted), the Editor has been compelled to alter the plan of the work, and to extend the boundaries of the country treated of. In the new edition, Mr. Sharpe has included all the species found in South Africa between the Cape Colony and Benguela on the west, and the Zambesi on the east coast, this country forming his *Subregio capensis* and having natural boundaries. As far as is possible this work is companion volume to Captain Shelley's "Birds of Egypt," and is illustrated by twelve plates by Mr. Keulemans.

Since Mr. Layard's book was written, much additional information has been collected by naturalists and travellers in South Africa respecting the birds of that vast region, which has resulted not only in the identification of numerous species not included in Mr. Layard's original list, but also in the rectification of the synonymy of species described by him, but then imperfectly known.

YARRELL (W.) BRITISH BIRDS, first edition, with both the two Supplements, *Largest Paper*, bound in 3 vols. imperial 8vo. *half green morocco extra, gilt tops, uncut, by Bedford, £36.* 1843-56

— British Fishes, first edition, with both Supplements, including a Memoir of Yarrell by Sir J. Richardson, *with portrait, Largest Paper, 4 vols. impl. 8vo. cloth, £40.* 1839-60

The beauty and delicacy of the wood-engravings in these books have never been surpassed, and the impressions appear especially brilliant in the *Largest Paper* state.

*The Great Pattern Book of Ornament and Decoration.***Owen Jones' GRAMMAR of ORNAMENT,**

*illustrated by examples from various styles of Ornament,*  
 1 vol. impl. 4to. *one hundred and twelve Plates, with English*  
*letterpress, extra cloth, gilt edges, £3. 3s* 1868

This great and, to practical Artists, absolutely necessary work, is now offered at the above extremely moderate price; 112 fine large plates, in gold and colours, with descriptive text. If any work is to spread Art Taste this valuable production on the highest branches of ornamentation will do it.

At this moderate price "The Grammar of Ornament" is brought within the reach of Artists, Architects, and their Assistants and Pupils, Designers, Art-workmen, and Students of every branch of Ornamental Art. This work also addresses itself to a still larger class of the public who, without having professional need of its teachings, have yet an enlightened sympathy with the beautiful, and would be glad to possess, as an aid to the practice of Illuminating and other accomplishments of a like elegant character, or as a decoration to their drawing-room able, this record of the art of so many countries and periods.

"A work already widely known, though not so much as it merits deserve, 'The Grammar of Ornament,' by Owen Jones. It is a magnificent volume, invaluable to the ornamentalist, and should be in every manufacturer's library."—*The Textile Manufacturer*, June, 1884.

## Smith's British and Roman Antiquities of

the NORTH WILTSHIRE DOWNS, in a Hundred Square Miles round ABURY.  
by the REV. ALFRED CHARLES SMITH, M.A., *Rector of Yatesbury, Wilts.*  
1 vol. atlas 4to. 248 pp. 17 large maps and 110 woodcuts, extra cloth, price  
£2. 2s 1885

This work, the materials of which have been accumulating for twenty-five years, is the result of innumerable rambles and rides over the Downs of North Wiltshire, and deals with one of the most important archaeological districts in Europe.

It consists of a large quarto volume, containing an account of all the Barrows, Camps, Roads, Dykes, Enclosures, Cromlechs, Circles, and other British and Roman stone-and earth-works of a most primitive district, with references to and extracts from the best authorities as well as figures of many of the various urns, and other objects found in Barrows, Views of Cromlechs, Plans of Camps, &c. Bound up with this volume in sections, are maps on the scale of 6 ins. to a mile, com-

prising one hundred square miles round Abury, and including thirteen miles from East to West, and eight miles from North to South being the great plateau of the North Wiltshire Downs, on which all the antiquities are shown and may be readily found and referred to by means of letters and figures.

This is a reprint undertaken by the Wiltshire Archaeological and Natural History Society, in consequence of more than one-third of the first edition, having been destroyed at the binders in the great fire in Paternoster Row, in 1883. The work can be obtained from
